# Retraction Note to: Increased frequency and nocturia in a middle aged male may not always be due to Benign Prostatic Hypertrophy (BPH): a case report

Kumar Gaurav<sup>\*</sup>, Jamie Fitch and Mukta Panda

## Retraction note

This article [1] has been retracted by the publisher because it was republished in the journal [2] due to an error during transfer of the journal between publishers in 2009. BioMed Central apologizes to the authors and readers for this error and for any inconvenience caused.
